BUILT SPACE FOR LEASE

Each floor is equipped with state-of-the art, customizable ICT infrastructure and security systems, energy-efficient lighting, heating, ventilation, and air conditioning.

Structure

- 4 stories above ground and basement
- The Flagship comprises north and south blocks connected by the link, which bridges both blocks at the respective floor levels.
- The south block comprises a ground floor and three upper floors; the north block comprises a ground floor, two upper floors and a roof garden terrace.
- Parking spaces – 30 spots above ground, 30 basement spots, transit hub provides significant parking space
- Elevator – Kone 16 carrier scenic elevator
- Construction type – a combination of structured steel and reinforced concrete; roof type comprises garden, reinforced concrete and sheet metal; building facade comprises GFRC and glazing curtain.
- Ceiling height: Basement – 4.05m, Ground – 5m, Floors 1,2 & 3 – 3.32m

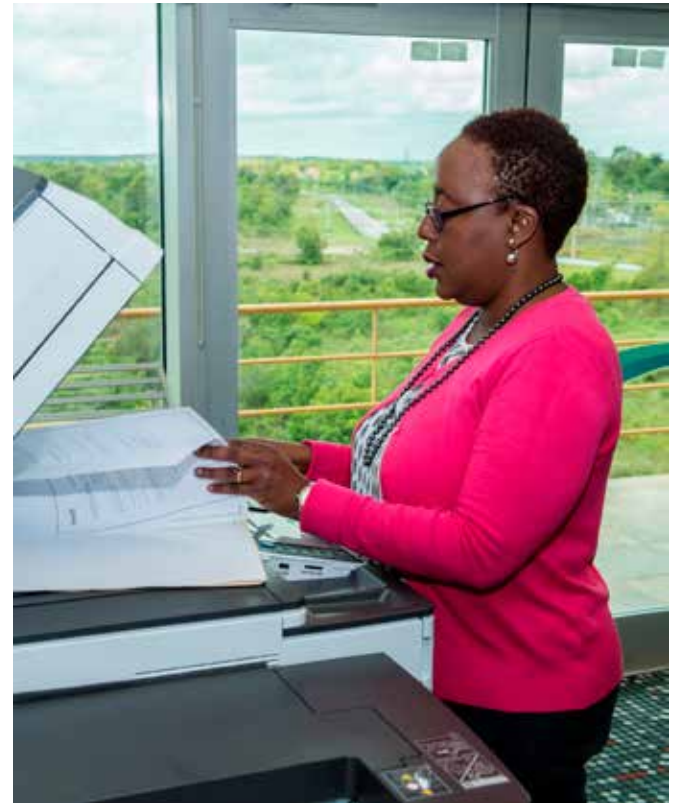

Utilities

- The HVAC system is powered by natural gas and operates via a chilled water system.
- The building is cooled by a centralized cooling system that provides 100% fresh air throughout the entire building. It utilizes two methods of air conditioning: displacement ventilation and total energy recovery (TER) system. TER permits heat and moisture removals from incoming outdoor air by exchange with cooler, drier, exhaust air.
- The Building is serviced by 100% backup electricity supply from a 1600 KVA generator located in the Utilities Building.
- 10 KVA UPS independent back up system on each floor & 20 KVA on basement floor
- Serviced by an integrated waste-water treatment plant located onsite.

ICT Infrastructure

- Both single and multimode fibre optic backbone cables with redundant paths from IT services room available to all floors of flagship complex.
- Modern Cat6A network infrastructure on each floor offering flexibility in distribution of network drops throughout.
- Includes IP video surveillance systems expandable to 100.
- Building Management System
